Bluetooth technology

Get the latest technology in access systems. The Bluetooth module lets you eliminate access codes, entry cards, and key distribution.

Touchscreen

Create an intuitive and structured contact list similar to that in your mobile phone. It is water resistant, vandal resistant and easy to read even in direct sunlight.

Camera with night vision

See who is standing in front of your door, even in total darkness. Moreover, the camera is hidden from normal view. The intruder has no clue they're being monitored.

2N® IP Verso

FEATURES & BENEFITS

Adjustable door security levels

Make use of different security modes with the 2N® Mobile Key application, which allows you to adjust the functioning distance from the Bluetooth module.

Intuitive controls and search

The touchscreen has all the functions of a mechanical keyboard. Discover its luxury design and intuitive controls and search.

Access control

Achieve a greater level of security for all those at its location. 2N® IP Verso makes it easy to prevent the entry of unauthorized persons.

Modularity

The modularity of this IP Intercom allows you to configure it to your requirements. Select the specific module, accessories and configurable functions.

SIP support with no server needed

SIP protocol support makes it easy to link the intercom with IP phones and PBX from other producers, without having to connect to the server.

Security relay

This simple additional device prevents intrusion by detecting any unauthorized manipulation of the electronic locking system.

Picture to email

2N® IP Verso allows you to email snapshots of the visitor captured by the camera at the time of the call.

Integration to the security system

Easily link the intercom to the existing security system and increase site security.
